

Outrigger Pad

We don't sell outrigger pad, we only customize it for you.

Why is the outrigger pad important?

To permit maximum lifting capacity and improve safety, outrigger pads are used to provide support to terrain and mobile crane outriggers.

When outrigger pads are used, the high pressures generated by cranes are distributed over a larger area, reducing the risk of a failure that may lead to a crane accident.

What can we help you?

1. Offering professional custom service on your request.
2. Specialized in OEM/ODM
3. Custom in a wide range of shapes, sizes, colors, etc.
4. Drop your thought, leave the rest to us.

Features:
